Ends or rejects a call. Clears entered

### Numpads

0-9, \*, #

## USB VoIP Phone

### Quick Installation Guide

### Hardware Installation

Connect the USB connector of the USB phone to your computer's USB port. When connected to your computer, Windows will automatically detect the new device. Complete the driver installation according to your Windows operation system.

For Windows XP/2000

Under Windows XP/2000, you don't need to install the driver. The system will automatically install Windows built-in audio driver. After that, you are ready to use the USB phone.

For Windows Me

When the Add New Hardware Wizard screen pops up, select Automatic search for a better driver and then click Finish to complete the Windows built-in driver installation.

For Windows 98SE

Upon detecting the new device, take these steps:

1. When the Add New Hardware Wizard screen

pops up, click Next.

2. Select Search for the best driver for your device. Click Next.

3. Clear all the selections and click Next.

## Application Installation

If you are using the USB phone simply as an audio input/output device in combination with an instant communication software, e.g., Google Talk, NetMeeting, MSN Messenger or Yahoo Messenger), you don't need to install any other software. Please ignore this chapter.

To use Skype/X-Lite/X-Pro with the USB phone in Windows 2000/XP, Skype/X-Lite/X-Pro is needed to be installed first. Refer to User's Manual for Skype/X-Lite/X-Pro Installation.

## Installing the Phone Manager

Phone Manager is a tool that enables your USB phone to communicate with Skype.

1. Insert the provided Software Utility CD into your CD-ROM drive. Locate and double-click the Setup.exe file in Software folder to launch the setup program.

2. Follow the on-screen prompts to proceed with the installation.

3. When prompted to run the Phone Manager, click OK.

4. For Skype User, Select Allow this program to use Skype and click OK.

5. When the Phone Manager is launched, its icon will be displayed in the system tray. You can right click the icon to configure the manager.

## Using the USB Phone with Skype

When the USB phone is connected to a powered on computer, the device will start to connect to the installed Phone Manager. When the Phone Manager is successfully connected the phone to the service provider, like Skype, the Phone Manager icon in the system tray will be changed, indicating the device is ready for use.
